‘STEM education: Requirements like infrastructure and gender disparity are among challenges educators face’

What is the concept of STEM education?
STEM is an acronym for Science, Technology, Engineering and Mathematics. It is a multidisciplinary approach to education that focuses on the integration of these four fields. The goal is to prepare students for the challenges of the 21st century by equipping them with the skills and knowledge needed to succeed in a rapidly changing world.

What are the challenges of STEM education?
There are several challenges associated with STEM education. One of the most significant is the lack of infrastructure, particularly in rural areas. Another major challenge is the gender disparity in STEM fields, where women are underrepresented. Additionally, there is a need for more teacher training and professional development to ensure educators are equipped to deliver high-quality STEM education.

How can we overcome these challenges?
To overcome these challenges, there is a need for increased government and private sector investment in STEM infrastructure and teacher training. It is also important to create a supportive environment for women in STEM fields, including mentorship programs and flexible work arrangements. Finally, there is a need for a cultural shift that values STEM education and encourages all students to pursue these fields.

Career Counselling & Workshops

Road Safety Educational Workshop

In India more than 4.3 lacs of accidents occur annually and out of these children involved in are 10 to 15 percent . Since children are more prone to accidents, it has always been our effort to organize various road safety activities in a sustained manner for awareness. Honda Motorcycle and Scooter co. pvt. Ltd. organised a Road Safety awareness programme

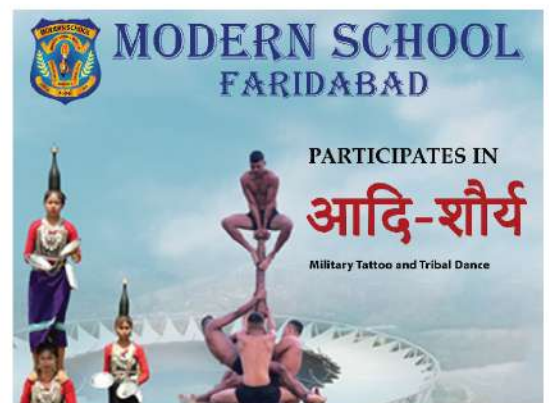

CAREER COUNSELLING

A Stream Selection Workshop exclusively for class X students and their parents was organised on March 22, 2023 in its Bhagwan Mahavir auditorium. At this threshold of career, most students face the dilemma of how to choose the right stream in class 11. Choosing a stream not only decides the subjects to study for next two years in class 11 & 12 but a student's entire future might depend on this specific decision.

Cyber smart WNS Fellowship Program. A Workshop was conducted for the students of class 4 to 12 in small batches on Feb.14 and 15,2023 Ms. Sanya Aneja , faculty member, conducted the workshop
